Application/Control Number: 10/717,722

Art Unit: 3735

The reply filed on 10/717722 is not fully responsive to the prior Office Action because of the following omission(s) or matter(s): It is still unclear whether applicant is intending to claim the sensor assembly alone that is adapted for use in a respiratory circuit, or the combination of the sensor and the circuit. In the response of 10/4/20007. applicant stated that the claim was to be drawn only to the sensor for use with the respiratory circuit. However, the examiner noted that applicant by stating that the main body was is affixed to the circuit, the claim clearly recited the combination. The examiner suggested that applicant stated that the sensor was adapted to be affixed to the circuit, which applicant did. However, the remainder of the claim 1 is inconsistent with the claim being drawn to the sensor only, as it recites that 1) the sensor is ... installed inside the inspired flow path and 2) that the heat transfer suppressing portion ... uses heat transfer with the curved portion and the inspired flow path. This recites a positive relationship and hence recites the combination. Therefore, the claim is still unclear. If applicant wishes to only claim the sensor, then all references to the respiratory circuit should be inferential, i.e. adapted to, for use with etc.

See 37 CFR 1.111. Since the above-mentioned reply appears to be bona fide, applicant is given ONE (1) MONTH or THIRTY (30) DAYS from the mailing date of this notice, whichever is longer, within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD MAY BE GRANTED UNDER 37 CFR 1.136(a).
